

Full-Stack Web Developer and MCA student with practical experience across the MERN stack, JavaScript, REST APIs, MongoDB and real-time application development. Built and contributed to e-commerce, communication, education, placement and service-oriented applications through internships, freelancing and independent projects. Strong foundation in Java, C++, Python, SQL, Data Structures & Algorithms and core computer science.

SKILLS

Languages	JavaScript (ES6+), Java, C++, Python, SQL, HTML5, CSS3
Frontend	React.js, React Router, Tailwind CSS, Bootstrap, Three.js, Responsive UI, Component-Based Development
Backend	Node.js, Express.js, RESTful APIs, Socket.IO, JWT, bcrypt, Authentication
Databases	MongoDB, MySQL, Database Design, CRUD Operations, API/Data Integration
Tools & DevOps	Git, GitHub, Postman, Vercel, Vite, Deployment, Debugging, API Testing
CS Foundations	Data Structures & Algorithms, DBMS, Computer Networks, Cloud Computing, Computer Architecture
Development	Full-Stack Web Development, Real-Time Applications, E-Commerce, Role-Based Systems, Performance Optimization

TECHNICAL EXPERIENCE

Freelance Web Developer Apr 2025 — Sep 2025
Freelancing Indore, India

- Developed responsive web interfaces and application features based on project requirements using modern JavaScript technologies.
- Worked across frontend and backend functionality, including API integration, database-driven features, debugging and deployment.
- Applied practical MERN development patterns to build maintainable, user-focused web solutions and improve application usability.

Web Developer Apr 2025 — May 2025
Coding Skill Hub India

- Worked on coding and web-development projects involving frontend implementation, application logic and practical problem solving.
- Strengthened hands-on skills by translating requirements into functional web interfaces and improving existing application features.

Web Developer Mar 2025 — Apr 2025
Yashit Servicer India

- Contributed to service-oriented web application development and user-facing interfaces for practical service workflows.
- Worked with web technologies to implement application features, troubleshoot issues and improve the overall user experience.

Web Development Intern Jul 2023 — Feb 2024
Byte-Billion India

- Gained hands-on experience with HTML, CSS, JavaScript and React.js while contributing to real-world web development projects.
- Built dynamic, responsive and user-friendly interfaces and supported frontend/backend development tasks in a collaborative environment.
- Improved practical understanding of application development, debugging, performance optimization and development workflows.

SELECTED PROJECTS

Synapaxon — Medical Student Learning Platform — Designed a medical-student learning platform concept with daily notes, AI-enhanced tests, categorized study material and strength/weakness analysis.

College Placement Portal — MERN — Designed a role-based placement platform for administrators, teachers and students to centralize placement workflows and student-focused functionality.

Real-Time Live Chat — React / Socket.IO — Built a real-time communication application with authentication, secure password handling, live messaging and a responsive interface using Socket.IO.

MERN E-Commerce Platform — React / MongoDB — Built an e-commerce platform with dynamic product listings, detailed product views, owner/admin functionality and product management features.

Three.js Ocean Store — Three.js / JavaScript — Created an immersive 3D ocean environment with animated visual effects and interactive 3D presentation for a modern web-store concept.

Career Connect — Transportation Booking — Designed a transportation-booking application concept focused on connecting users with transportation services and simplifying booking workflows.

Additional Projects: Barber Service Platform | Weather Forecasting App | To-Do Application

EDUCATION

Master of Computer Applications (MCA), India 2025 — 2027
Bachelor of Computer Applications (BCA), IPS Academy, Indore, India 2021 — 2024
